

I am commenting in opposition to the proposed plan to expand LPFM. Stations such as Air 1 and KLove provide me a valueable service to me and others in the Phoenix area community by providing clean, positive music, with an uplifting message. These station also provide a commercial free alternative to the other stations in the Phoenix area. In a time where commercialism is encroaching on us and more, these stations serve as a refuge to hear music without trying to be sold or told how to think. These stations value is supported by listeners putting their money where their mouth is and personally investing in the stations operations. Please don't risk putting such valueable stations out of the market by giving LPFM priority over pre existing stations.
